ARCHITECTURE

Built on the same systems - *banks and governments use.*

PRIMARY

AWS Mumbai (ap-south-1)

Where your data lives, day-to-day.

S3 encrypted | RDS encrypted | CloudFront CDN

Real-time replication

LIVE SYNC

FAILOVER

AWS Hyderabad (ap-south-2)

If Mumbai goes down, this takes over instantly.

S3 replica | RDS replica | Auto fallover

Always ready. Never accessed unless needed.

Bank-grade encryption

Same level as your bank lives for net banking.

Two cities, always

Mumbai + Hyderabad. Disasters can't take it down.

Keys you control

Your data is locked. Even AWS can't read it.

Stays in India

Indian data law (DPDP) compliant. No cross-border.

SECURITY . POLICY

Every layer of Soult is designed with one principle: your data belongs only to you. Not to us, not to advertisers, not to anyone else.
